## REMARKS.

When Gold Coins have been clipped, or made light by any other process, the following will enable you to ascertain their value—the first with American Silver—

Half Eagle is equal in weight to  
Sovereign is equal in weight to  
Napoleon is a shade lighter than

31½ cents of silver  
30 cents of silver  
2 cents of silver

\* An American quarter and a 10-cent piece.

X Thaler is a shade lighter than  
Ten Guilder is equal in weight to  
Double is equal in weight to

30 cents of silver  
25 cents of silver  
100 cents of silver

These coins are of the same size as the Sovereigns, 20 Franc Pieces, X Thaler, Spanish and Prussian Dollars, and 16 Marks, &c., and are made of the same metal, with the difference between them being only in the weight. The gold on this book can only correspond with their own value, or what they are actually worth in demand, and to have.

It will be perceived that we have reduced the quotations to the Gold Coins of Central America. Proceeded 1840, of reduced in value, consequently of value, have recently made their appearance. From the close resemblance of the Austrian Half Sovereign and the present have been taken the one for the other, and in order to prevent a mistake in future, we have placed them side by side.
